## Code change procedures

1. **With the door opened,** enter existing code.
2. Press the * button down with a suitable tool - **fully press and hold until step 5**
3. Press 'C' button to clear the existing code.
4. Enter the new code.
5. Release the * button.
6. Press 'C' to set the new code.
7. The new code is now set and ready for use.
8. Check that the code is working 5 times and that it is rotating the cam before closing the door.

Please note: If a mistake is made whilst entering a new code
(with the * button pressed) the 'C' button can be pressed which
will cancel any buttons that have been pressed and you can start again.
